

14. At the Mayo Hospital the most fatal disease was cholera, which occasioned 83 deaths out of 160 cases, or 51·8 per cent. The mortality from fever was slight, being only 10 per cent. One case is said to have presented all the characteristics of true typhoid. The deaths from dysentery and diarrhoea were very numerous. Many of the patients were admitted in a moribund state. There were 173 operations with 21 deaths, which gives a percentage of 12·1.

15. At the Howrah Hospital 9,720 natives and 4,431 Europeans were treated during the year. Among in-patients there was an increase of 58 Europeans and 25 natives; while there was a falling off among the out-patients of 607 Europeans and 227 natives. This decrease is said to be only apparent and due to the register being more carefully prepared. Of the Europeans, 276 were sailors, against 196 in the year before; the total mortality was higher than that of the previous year, the death-rate per 1,000 among European patients being 44·77 in 1881 against 29·41 in 1880, while among natives it was 293·81 against 291. The Superintendent considers the new ward for natives has been of great value in reducing the number of cases of septic poisoning after severe injuries and operations. The water used in the hospital is brought in skins from Calcutta, and is unfavourably noticed by the Superintendent. The Surgeon-General will make the necessary enquiries on this subject. The project of a water-supply to Howrah is under consideration. The other arrangements of the hospital are satisfactory.

16. The financial results of the management of the Calcutta hospitals during the year were, on the whole, satisfactory. The amount of invested capital rose from Rs. 5,30,200 at the beginning of the year to Rs. 5,34,700 at its close. The total expenditure, exclusive of the amount invested, was Rs. 4,03,250 against Rs. 3,85,186 in the previous year. The increase is due to the large expenditure during the current year on building and repairs, chiefly in connection with the Campbell Hospital. The expenditure on this account rose from Rs. 33,685 in 1880 to Rs. 74,309 in 1881. The reduction in the other main heads of expenditure amounted to Rs. 22,560, of which Rs. 12,066 was under the head of diet and stimulants. There is a difference of Rs. 4,226 between the opening balance for 1881 and the closing balance shown in the Report for 1880. This is due to the inclusion in the accounts for the past year of the receipts and disbursements of Prince Gholam Mahomed's Fund. The closing balance for 1881 amounted to Rs. 13,364-12-4.

17. In the *Medical College Hospital* the total expenditure was Rs. 89,184 against Rs. 1,01,750 in 1880. There was a slight increase under the heads of establishment and miscellaneous charges; all the other heads show a decrease. The expenditure on bazar medicines in the hospital fell from Rs. 1,018 to Rs. 857, and in the associated dispensary (Choonee Lal Seal's) it rose from Rs. 175 to Rs. 370. The expenditure on Europe medicines was Rs. 9,204 against Rs. 11,440. The latter sum included expenditure on instruments purchased for the first time. The cost of diet and stimulants fell from Rs. 29,752 to Rs. 25,787. The reduction is said to be due chiefly to the cheapness of provisions in the year under review. The average cost of each diet for Europeans was 6 annas against 6 annas 6 pies in 1880, and for natives it was 2 annas 6 pies against 2 annas 10 pies. The miscellaneous charges rose from Rs. 9,915 to Rs. 10,993. The increase was chiefly due to the larger quantity of dressing and bandaging cloth required for the antiseptic treatment adopted in the First Surgeon's Ward.

18. The expenditure in the *Presidency General Hospital* was Rs. 1,03,894 against Rs. 1,02,352 in 1880. The accounts of Prince Gholam Mahomed's Fund were amalgamated with those of the hospital: the receipts from the Fund were Rs. 1,511, the expenditure Rs. 681, and the closing balance Rs. 5,057. The increase in the total expenditure was attributable to the higher charges for building and repairs. The receipts from the Port Commissioners fell from Rs. 65,168 to Rs. 39,235. The decrease was mainly due to the reduction in the payments for seamen from the Port Hospital Dues Fund. These were reduced from Rs. 2 to Re. 1-4 per diem in November 1880, and to Re. 1 in August 1881. Dr. Payne points out that this rate is insufficient, as the total actual cost per patient per diem was Rs. 1-13-4 in 1880 and Rs. 1-7-8 in 1881. It is believed that if all establishment and miscellaneous charges were included, the average cost would be found to be higher. Government, however, were

compelled to reduce the rate, and to place this heavy charge on the public revenues in order to avoid legislating to raise the limit of the Port Hospital Dues, and thus throwing additional expense upon the Shipping of the Port. The cost of bazar medicines fell from Rs. 1,855 to Rs. 1,599, and that of Europe medicines from Rs. 5,176 to Rs. 4,449. The expenditure on diet was at the same rate as in 1879 and 1880. The expenditure on stimulants was, however, considerably reduced, being only Rs. 842 against Rs. 1,206 in 1880. This result is satisfactory. The average cost per patient per diem of diet and stimulants combined was 7 annas 9 pies against 8 annas 1 pie in 1880. This includes paying patients.

19. In the *Campbell Hospital* the total expenditure amounted to Rs. 1,02,773 against Rs. 69,295 in 1880. The whole of the large increase is due to the expenditure on repairs and improvements, which amounted to Rs. 49,474. Apart from this outlay, there was a reduction under every head of expenditure. This was, however, mainly due to the smaller number of patients treated. The daily average cost of diet was 7 annas 2 pies for Europeans and 2 annas 4 pies for natives. The repairs and improvements have been carried out on a most extensive scale. They included the construction of a dead-house, the conversion of the old Blind Asylum into a new dispensary office and quarters for the Resident Surgeons, the re-roofing of a large portion of the Hospital building, as well as the ordinary quadrennial repairs. In the Police Hospital the charges were much the same as in the previous year. The average cost of diets fell from 2 annas 8 pies to 2 annas 6 pies, the result of a fall in prices for all articles of food in 1881.

20. The funds of the *Mayo Hospital* are in a most flourishing condition. The invested capital on 1st January 1881 amounted to Rs. 3,34,900, and this was increased during the year by Rs. 2,500, bringing the total up to Rs. 3,37,400. The Surgeon-General suggests that in view of the sums invested in this hospital from annual income, the payments of Government should be re-considered. These payments amounted to Rs. 37,366 during the year under review. The proposal will be considered in the Financial Department of this Government. The total expenditure amounted to Rs. 59,413 against Rs. 55,159 in the previous year. The expenditure on Europe medicines amounted to Rs. 9,784, which is Rs. 4,096 in excess of that of 1880. It is explained that there is now a large stock of medicines in hand, which is expected to last for some time. The daily average cost of diets was 2 annas 11 pies against 2 annas 8 pies in 1880. If diets privately supplied are excluded, the cost becomes 3 annas 2 pies against 2 annas 11 pies last year. Not only was the average cost higher than in any other Calcutta hospital, but it was higher than the cost in the same hospital in the previous year, although 1881 was a notoriously cheaper year than 1880. The Lieutenant-Governor considers that some explanation should have been given of this.

21. At the *Howrah Hospital* the income from private sources fell from Rs. 31,763 to Rs. 23,665. The decrease is attributed chiefly to the reduction in the charge for treatment of sailors from Re. 1-4 to Re. 1 per diem. The receipts from this source appear to have been credited under the head of "Receipts from local or other funds." The Government grant amounted to Rs. 5,276 against Rs. 8,649 in the previous year. The total expenditure was Rs. 28,042 against Rs. 34,950. There was a large increase of expenditure under the head of bazar medicines, which is not explained. The average cost of diet for Europeans rose from 7 annas 11 pies to 9 annas 2 pies. This increase is abnormal. The cost of native diets was the lowest in all the hospitals.

22. The total expenditure on the sick in all the hospitals taken together was Rs. 2,90,106, of which Rs. 2,74,388 was paid by Government. The average daily attendance was 2,889, of whom 1,044 were in-patients and 1,845 out-patients. Of the daily average 381 were Europeans and 2,508 natives.

23. The number of Europeans treated in the Medical College and General Hospital was 5,043, of whom 277 died, giving a death-rate of 54 per mille against 50, the average of the previous three years. Similarly the number of natives treated at the Medical College and Campbell Hospitals was 8,667, of whom 1,922 died, giving a death-rate of 221 per mille against 235, the average of the previous three years. The total charge for diet and stimulants in the Medical College and the General and Campbell Hospitals was lower than it has

ever been before. It amounted only to Rs. 70,231 against 82,534 in 1880 and 78,878 in 1879. Thus a large reduction in the expenditure on diet and stimulants has been accompanied by a considerable decrease in the death-rate for natives, and a very small increase in that for Europeans. This small increase is wholly attributable to the reduction in the number of sailor patients whose ailments are usually trifling, and tend to keep down the European death-rate.

ORDER.—Ordered that a copy of this Resolution, and of the Report, be submitted for the information of the Government of India, in the Home Department.

Ordered also that a copy of this Resolution be forwarded to the Surgeon-General, Bengal, for information and guidance.

Ordered also that a copy of this Resolution, and of the Report, be forwarded to the Chairman of the Corporation of the Town of Calcutta, and to the Commissioner of Police, Calcutta, for information.

Ordered also that extract paragraph 20 of this Resolution, together with extract paragraph 66 of the Report, be forwarded to the Financial Department of this Government for consideration.

Ordered also that the foregoing Resolution be published in the *Calcutta Gazette* for general information.

By order of the Lieutenant-Governor of Bengal,

COLMAN MACAULAY,

Secretary to the Government of Bengal.

REPORT ON THE WORKING OF THE JUTE WAREHOUSE ACT IN THE SUBURBS OF CALCUTTA DURING THE YEAR 1881-82.

No. 47MM, dated Alipore, the 8th June 1882.

Memo. by F. B. PEACOCK, Esq., Commissioner of the Presidency Division.

COPY, with enclosures, submitted to the Secretary to the Government of Bengal, in the Medical and Municipal Department, with reference to paragraphs 3 and 4 of his letter No. 723, dated the 20th August 1881.

No. 2FB, dated Alipore, the 25th May 1882.

From—R. C. STERNDAL, Esq., Vice-Chairman, Suburban Municipality,
To—The Magistrate of the 24-Pergunnahs.

UNDER section 27, Act V of 1879 (B.C.), I have the honour to submit, for transmission to Government, the annual report on the working of the Jute Act during the year 1881-82 in the Suburbs of Calcutta, together with a statement showing the jute warehouses in the Suburbs for which licenses were granted during that period.

2. The number of licenses issued was 92, and the amount of license fee payable on account of the said licenses amounted to Rs. 15,912, as will appear from the accompanying statement.

3. Under orders of Government, dated 20th August 1881, the period for which licenses were granted, known as the jute year, and which ran from 1st August to 31st July, was changed to the official or financial year, viz. from 1st April to 31st March, and at the same time the rate of fees was reduced from 10 per cent. on valuations to 5 per cent.; this entailed a good deal of trouble and necessitated a readjustment of accounts with all the existing license-holders.

4. The following amounts were charged against Jute Fund, viz., inspection establishment, Rs. 1,884; proportion of executive charges at 10 per cent. on the collections, Rs. 1,604-11-2; and the amount made over to the Commissioner of Calcutta Police for maintenance of fire-brigade, Rs. 7,411-1-1, as per bills submitted by him.

5. The account shows that there is, even with 100 per. cent. reduction in the fees, a comparatively large balance; but the charges have been hitherto low, and a certain margin is necessary to meet the probable increase in the cost of the fire-brigade, which recent serious fires have shown to be hardly equal to the suppression of extensive conflagration.

6. There were 16 cases instituted against as many persons before the criminal bench for breach of the Jute Act, viz. one under clause 2, section 6, Act V of 1879, for using the roof of a warehouse for drying loose jute without the sanction in writing of the Commissioners; five cases under clause 1, section 6, Act V of 1879, for storing jute in buildings other than the licensed warehouses in the occupation of the defendants; nine under section 12 of the said Act for establishing warehouses without license, and one case under section 16 for omitting to give notice on change of occupation, and an aggregate sum of Rs. 425 was levied as fines inflicted on 14 persons, and two persons in two cases were warned and discharged. Of this amount Rs. 135 only was received from the Magistrate during the year.

7. A statement showing in debtor and creditor form the income and expenditure under the Jute Act V of 1879 (B.O.), as called for by paragraph 4 of the Government letter No. 723, dated 20th August 1881, is herewith submitted.

8. Twenty-six fires occurred in the Suburbs during the year under review. A tabular statement showing the property destroyed by fire, and the estimated value thereof as furnished by the Deputy Commissioner of Police, is also herewith submitted.

9. The jute crop during the year under review was a bumper one; but owing to the dulness of the market for a considerable portion of the year, the warehouses in the Suburbs remained overstocked; they are now gradually being cleared by petty sales.

NOTE.

Barometric Pressure.—The pressures in column 2 of the above table for all stations below 500 feet are reduced from those given in column 3 of the table on the previous page, by adding the weight of a column of air of the temperatures given in column 18. For stations above 500 feet elevation the reduction is made by Captain Allan Cunningham's table, "Prof. papers on Indian Engineering, No. CXIII." The temperatures at the sea-level are taken from column 3 of the above table.

Temperature.—The temperatures in column 3 are reduced from those in column 18 on the preceding page, by adding 1° Fahrenheit for every 450 feet.

Wind Resultant.—The resultant wind direction and its comparative predominance are calculated from the whole number of wind observations recorded during the month. The relative predominance in the direction of the resultant is given as a percentage of the whole number of observations. The direction is computed in the usual way by Lambert's formula.

Cloud.—This column gives the average proportion of clouded sky, a cloudless sky being indicated by 0, and one completely overcast by 10.

The above, being all comparable, afford the data for constructing a meteorological chart for the month, which will show the isobaric and isothermal lines and the resultant wind directions, which last may be represented by arrows of varying length, proportioned to the prevalence of the wind. To these may be added the rainfall from the previous tables.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86 formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The direction of the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

METEOROLOGICAL OFFICE, INDIA,

JOHN ELIOT,

The 26th June 1882.

for Meteorological Reporter to the Govt. of India.

Report of Fluctuation of Traffic on the Eastern Bengal Railway for the
four weeks ending 22nd April 1882.

Report on Goods Traffic for the four weeks ending 22nd April 1882.

EASTERN BENGAL RAILWAY COMPANY, TRAFFIC SUPERINTENDENT'S OFFICE, SEALDAH TERMINUS.

No. W—29-57, dated Calcutta, the 13th June 1882.

From—W. INNES, Esq., Traffic Superintendent, Eastern Bengal Railway Company.

To—The Agent, Eastern Bengal Railway Company.

I BEG to forward the usual comparative statement of traffic for the four weeks ending the 22nd April last, from which it will be seen that the gross weight carried over the railway during that period was 10,23,256 maunds, being an increase of 3,36,795 maunds, or 49 per cent., over the figures for the corresponding period of 1881.

All the principal staples, with the exception of grain and seeds, contribute to this satisfactory result, jute alone contributing 1,60,859 maunds.

	<i>Increases.</i>	
Cotton in bundles	8,468 Mds.	
Less do, in bales	3,088 "	
	<hr/> Net increase	5,380 "

The revival of the improvement in this staple which was noted in the previous four weeks, still continues, nearly the whole quantity being despatched from Dacca and Narayanganj.

Gunny in bundles	6,813	Mds.
Less decrease in bales	646	"
Net increase	...					6,167	"

The greater part of this increase is made up of consignments received from the Northern Bengal State Railway.

Hides
							5,951 Mds.

There was a decrease recorded last month as due to an accumulation of this staple in the Calcutta Bazar; that decrease is more than made good by the present increase. Dacca exports the bulk of the total quantity.

Jute in drums	1,92,662	Mds.
Do. in bales	38,197	"
						<u>1,60,859</u>	
Net increase	...					1,60,859	

The increase hitherto recorded from month to month still continues, there being still, according to reports, considerable quantities of last season's jute on hand.

Railway materials (foreign)	28,858 Mds.
-----------------------------	-----	-----	-----	-----	-----	-----	-------------

This increase consists of partly materials forwarded to Ranaghat for the Central Bengal Railway Company, and partly to the Calcutta and South Eastern Railway for the Mughlat Extension.

[illegible]

This important staple still continues to improve, traffic to all stations sharing in the improvement.

[illegible]

During the last four months, we have carried 69,152 maunds of sugar more than during the same period of 1881. Of the total quantity carried this month, Kissingunge contributes 35,459, maunds, and Chooadanga 10,657 maunds. The increase is due to exports on a larger scale than usual to Europe.

[illegible]

Of the total quantity carried, 35,310 maunds comes from the Northern Bengal State Railway.

Miscellaneous	1,04,759 Mds.
---------------	--------	---------------

This heading embraces all traffic not otherwise classified, and shares in the general improvement.

Decreases.

[illegible]

The cause of this large decrease is attributable to the small demand for exportation.

[illegible]

The decrease in this staple is due to the continued dulness of the market.

Report on the Fluctuations in Traffic on the Northern Bengal State Railway for the month of May 1882.

GENERAL REMARKS.

FURTHER advices from the District confirm the statement made in last month's Traffic Report as to the large quantity of last year's crop of jute still available for despatch. What benefit owners hope to derive by holding it back is, in the face of such a bumper crop as this season's sowings give promise of, a mystery.

Enquiries go to show that, in spite of the large stocks held and the comparatively low prices obtained for last year's cultivation, about one-third more land is under cultivation with jute than last year.

When it is remembered how very narrow a margin of profit business is done for in an important staple like jute, and that during May 1881 the average price per maund at the port was Rs. 4-6 against Rs. 3-9-3 for May 1882 (the month sowings are made), it is proof positive that jute even at the lower rate is, in the estimation of the cultivator, the best paying crop he can grow

INCREASES.

Ginger Mds. 4,625

Seventy-one maunds of this staple only were carried during May 1881, against 4,696 under review. The increased weight carried is in fulfilment of shipping contracts.

Gunny-bags Mds. 5,462

Although this is a considerable increase over the weight of gunny-bags carried during May last year, there has really been a sudden falling off in despatches as compared with last month's (April) traffic. This has been brought about by a falling off in the demand for gunny-bags of all sorts, and a decline in mill-made bags.

Jute Mds. 10,543

The jute market has been extremely dull during the month, and a further concession of about two annas a maund has been made by holders, but without the effect of causing any large quantity to change hands. This will account for the drop in despatches from 68,000 maunds in April to 19,000 maunds this month. When the prices ruling during May last year are compared with those at which the article is now being offered, it is a matter for satisfaction that the month's working shows an increase (however small) instead of a decrease.

Tea Mds. 5,473

The season, although at first giving promise of being an unusually early one, has, owing to want of seasonable weather during the months of February and March, turned out a late one throughout the Darjeeling district, and the short despatches early in the season are now being made up.

Tobacco Mds. 22,284

This staple is gradually, but surely, being drawn to the line by the low rates now in force. The weight carried during the month under review is, it will be seen, more than double that hauled during May last year.

All other goods Mds. 21,627

This increase is in both upwards and downwards traffic. In May 1881, 28,152 maunds passed up and 10,051 maunds down. This month 41,529 maunds passed up and 18,301 maunds down.

DECREASES.

Ale Mds. 615

A cessation in the despatches of commissariat beer for the use of the troops at Darjeeling is the cause of this falling off; the decrease will, in all probability, be met by an increase later on.

Food-grain Mds. 23,497

Over eight lakhs of maunds of rice are stored in Calcutta, and comparatively little business is being done. In these circumstances it is a matter of surprise that so much as 1,24,240 maunds should have been despatched, and that the falling off is not much more serious.

Piece-goods Mds. 830

The heavy despatch made for some months past accounts for this decrease.

Railway material Mds. 22,683

Less locomotive coal and a cessation in despatch of material for the Dinapore extension in view of the setting in of the monsoons and consequent stoppage of work is the reason of the short weight shown under this head.

Salt Mds. 5,408

This decrease is a mere trade fluctuation and will most likely be met by an increase next month.

Sugar Mds. 1,309

The only reason that can be assigned for the falling off in this staple, in spite of the reduced rate, is that the local outturn being unusually large for the area under cultivation has rendered it unnecessary to import for a time.

Report of Fluctuation of Traffic on the Patna-Gya State Railway for the month of May 1882.

THE total quantity of goods carried during the month of May 1882 aggregated maunds 1,31,321 as compared with maunds 1,36,840 carried during the corresponding period of 1881, and maunds 1,37,398 carried during the previous month, showing a decrease of maunds 5,519 and 6,077 respectively.

Of the several increases and decreases, the following are the most prominent ones and worthy of separate explanation :—

INCREASES.						Mds.
Coal	8,481
Imported by merchants for brick-burning purposes.	8,399
Food grains	2,911
This has been repeatedly explained in previous reports.	4,581
Iron	15,170
Due to the requirements of the Road Cess and other Engineering Departments.	6,517
Sundries	
This cannot be explained in detail as it is composed of miscellaneous articles.						
DECREASES.						
Seeds, oil	
Owing to the dullness of the Calcutta Market.	
Tobacco	
Due to the unfavourable crops. Other decreases are nominal.

SOMASTIPUR, the

1882.

A. W. U. POPE, Asst. Traffic Superintendent.

Report of Fluctuation of Traffic on the Tirhoot State Railway for the month of May 1882.

THE total quantity of goods carried during the month of May 1882 aggregated maunds 3,36,372, as compared with maunds 3,09,083 carried during the corresponding period of 1881, and maunds 3,60,379 carried during the previous month, showing an increase of maunds 27,289 in the one case, and a decrease of 24,007 maunds in the other, which is attributable to the temporary check to through booking.

Of the several increases and decreases, the following are the most prominent ones and worthy of separate explanation :—

INCREASES.						Mds.
Chillies	1,175
This will improve shortly when the Calcutta and Cawnpore markets are brisk.						

Coal ... Mds. 36,198
 This is Messrs. Burn & Co.'s coal for construction purposes, a small portion being also for private parties.
 Ghee ... Mds. 1,920
 This is an export traffic from Durbhangah and Somastipur to Howrah. The increase is due to the river being unnavigable. Merchants avail themselves of the railway when the demand in Calcutta requires quick supply, otherwise boats are resorted to.
 Hides and horns ... Mds. 2,677
 Depends on local collection.
 Iron ... Mds. 1,575
 Due to the Jail and other civil buildings being under construction at Durbhangah, and also to machinery received during the month for indigo concerns.
 Railway materials ... Mds. 47,398
 Due to the three extensions of Tirhoot State Railway being under construction.
 Saltpetre ... Mds. 3,638
 Since the Government rules regarding manufacture of saltpetre have been relaxed, this traffic has improved steadily, and will shortly resume its former place as one of the principal staples of traffic on this line.
 Seeds, oil ... Mds. 18,016
 The business done under this head during the month is satisfactory, but it cannot be expected to be as high as during the past year owing to small crops and the bad quality of the outturn.
 Sugar ... Mds. 3,056
 Messrs. Mathew & Co. have established a Factory in the neighbourhood of Durbhangah, hence the increase in export of this staple. Its further increase depends on the success of the enterprise.

DECREASES.

Food-grains ... Mds. 26,630
 Wheat crop having been harvested, demand for other grains has decreased.
 Lime and kunkur ... Mds. 4,314
 s traffic would have been very high, but as the rolling stock is limited, repeated applications from merchants for its conveyance n refused, and a very large accumulation of this staple exists.
 Piece-goods, English ... Mds. 4,312
 ing the last few months large quantities were imported, which have not been exhausted as yet. The season for Hindoo marriages passed away and there is not much demand.
 Salt ... Mds. 12,704
 This is mainly due to the decrease in salt duty lately ordered by Government.
 Sundries ... Mds. 16,778
 This cannot well be explained.
 Tobacco ... Mds. 27,341
 Previous remarks are applicable to this also. The temporary check to through booking and the insufficiency of rolling stock has caused considerable delay to tobacco and other merchandize which await despatch in large quantities.

Nov. 8th	152	8vo. dy.	1st ...	1,000	ditto ...	3 0 0	Hara Charan Sen, Bogra.	An allopathic monograph	740
" 30th	134	12mo. dy.	1st ...	500	ditto ...	0 10 0	Chandra Kumár Bhattácharjya, Jhámápukar, Calcutta.	The author brings forward the usual arguments against early marriage and advocates the introduction of the English system of marriage in this	741
country. He is of opinion, however, that the system of marriage, prescribed by Manu, was in many respects better than the present system. He also urges the necessity of destroying the intellectual distance now existing between the men and the women of Bengal.									
Oct. 25th	256	12mo. ...	1st ...	2,000	ditto ...	1 8 0	Rabindra Náth Tagore, 6, Dwáráká Náth Tagore's Lane, Calcutta.	Thirteen letters descriptive of certain forms of English private and public life, as seen in England by a young Bengali Babu. Some of the most important features of English	742
social and domestic life are compared with the corresponding features of Bengali life, and the comparison is almost on all points in favour of the former. The letters are written in a colloquial style, and have been reprinted from the Bengali periodical <i>Bhárati</i> , to whose editor they were originally written from England.									
Nov. 19th	159	8vo. dy.	1st ...	500	ditto ...	1 0 0	Chandra Náth Basu, M.A., Calcutta.	Kálidás's <i>Sakuntalá</i> is reviewed in this book. The characters of Dusmanta and Sakuntalá are analysed at great length, and the story of their marriage is	743
examined with a view to ascertain the great principles of human nature which it illustrates. The plan of the drama is said to be to assert the independence and reality of matter and spirit as cosmic principles, to prove the strength of man's animal nature as compared with his spiritual nature, and to suggest the means by which harmony may be established between the two natures.									
" 26th	109	12mo. rl.	1st ...	1,000	ditto ...	1 0 0	Girish Chandra Ghosh, Bág-bazar, Calcutta.	A well-known story from the <i>Mahábhárat</i> dramatised for the Calcutta stage.	744
